### 31ST ANNUAL GENERAL MEETING

31st Annual General Meeting of the members of the Company will be held on Tuesday, 5th September, 2017 at 10.00 A.M. at Ahmedabad Management Association, ATIRA Campus, Dr. Vikram Sarabhai Marg, Ahmedabad – 380 015.

Dear Shareholders,

From the past few years, India is emerging as one of the fastest growing economies in the World. The growth forecast for India during the year 2016-17 was around 7.8%, however, the demonetization drive of the Government resulted into slowdown of the economy in the last quarter of the year. The economic growth slowed to 6.1% in the fourth quarter ending March 2017, compared with 7.1% in the previous quarter, as the Government's note ban decision slowed activity in cash-dependent sectors. The GDP growth stood at 7.1% during the year. The Indian Economy is expected to further accelerate at 7.7 – 8% during FY 2017-18.

The global economy in the year FY 2016 – 17 was stable as compared to last year. The Global Economic activities seem to be improving gradually with a long-awaited cyclical recovery in investment, manufacturing, and trade. Also, the world growth is expected to rise from 3.1% in 2016 to 3.5% in 2017 and 3.6% in 2018 as projected by World Economic Outlook owing to all the upside developments of stronger activity, expectations of more robust global demand, reduced deflationary pressures and optimistic financial markets around the world. But structural impediments to a stronger recovery and a balance of risks that remains tilted to the downside, especially over the medium term, remain important challenges.

While in India, the demonetization was a small blip in the GDP and the economy growth story of the Country, the structural story for the Country remains extremely strong and the Indian Economy has the potential and the opportunity to grow between 8 – 10% for a sustained period of 10 – 15 years taking the GDP from current 2.2 trillion USD to 10 trillion USD. If this happens, Industries like Cement and Steel will be the biggest beneficiary as large sums of money will be invested into building of infrastructure not only to support growth but also to make the economy more efficient and productive. Due to the focus of the Government on Infrastructure Development, Roads and Ports construction, projects like Sagarmala, Housing for All, Increased Investment in Railways and Defense Sectors and initiatives like "Make in India", the steel consumption will increase dramatically in the coming years. India has entered into a phase of low interest rates and low interest regime is expected to continue for at least next five years. This will substantially boost the demand for housing, white goods, two wheelers and cars. All this will drive the steel demand towards the 300 million ton mark.

The market going forward is looking extremely encouraging. With the demand for steel increasing due to various initiatives taken by the Government, more and more new steel capacity will be set up in the Country. This should help us substantially increase our engineering business over the next few years.

For the first time after many years, the Government is speedily taking policy decisions to protect various industries from the onslaught of Chinese dumping by taking quick and correct measures of anti-

dumping duties and imposition of other trade barriers like MIP. The Steel Industry has benefited from such Government Policies in the last 1-2 years and will continue to benefit if the Government continues to provide the support.

These and many other indicators give us the confidence and faith that the steel industry can only exponentially grow from here onwards and mirror the growth expected in the economy.

While all of us understand that the steel industry has passed through a very difficult time over the last 4-5 years and mid to large size players have specially been severely affected not only on account of weak demand but also on account of non-availability of Iron Ore due to Supreme Court related issues, we believe that the best years of the steel industry are ahead of us.

Needless to say that the increase in demand over the next 10 years will have to be met by various steel producers by adopting the best-in-class, efficient and cost effective technologies to produce quality steel at reasonable costs. The new notification by Ministry of Steel (Government of India) eliminating the difference between primary and secondary producers is a huge step and opens up very large new opportunity for steel producers producing steel through the Induction Route who could not participate in India growth story earlier.

The Company continues on the path of cost management through cost optimization on all fronts viz. inventory management, repair and maintenance, logistics as well as focus on efficiency improvement and achieving higher productivity. The profitability of the Company should improve going forward.

We at Electrotherm have continued to develop state-of-art technologies and steel melting solutions over the last 35 years of our existence. This includes but is not limited to design and development of the largest sized furnace at any given time, high speed modular caster enabling direct rolling and ELdFOS process with Electrotherm refining furnace enabling simultaneous lowering of sulphur and phosphorus in the steel making process. Our Brand 'ET TMT Bars' has constantly remained at number one position in the TMT Bars segment. We have also introduced fusion bonded epoxy coated TMT Bars facility at our Kutch Plant. We remain one of the largest producers of ductile iron pipes in the Country.

The Company has already settled substantial portion of its outstanding debt and also started paying scheduled dues since March 2015 to ARCs and Banks. In the present difficult scenario of the steel industry, our approach towards Banks indicates Company's seriousness towards settling of its liabilities.

On behalf of the Board, I thank you as the Shareholders of the Company for your support and motivation during the year. I would also like to thank the Lenders, Suppliers, Customers, various National and Provincial Governments with whom we have been working, the Employees and the Associates who have stood by the Company and I look forward to their continued support in the future.

**Mukesh Bhandari**  
Chairman & Managing Director

**III. Other Information:**

**(1) Reasons for loss:**

1. The company started facing problems in sourcing of its key raw material (iron ore) due to various issues in the state of Karnataka including ban of iron ore mining by Supreme Court. All the steel making units, especially the ones operating in West and South India, were severely impacted on account of this.
2. The company's profitability took a severe beating and the company incurred large cash losses post March 2011 both on account of lower capacity utilization and sourcing of expensive raw material through imports.
3. Due to the non-availability of iron ore and reduced realizations of products, the company was not able to utilize the plant at optimum capacity which resulted in increased operating cost and low output.
4. The company also suffered financial stress due to Interest rate hikes which increased from 10% to 14% between 2008 to 2011 due to frequent RBI intervention to control inflation.
5. The company was facing serious liquidity crunch due to which it is unable to fully utilize its steel and pipe making capacities.

**(2) Steps taken or proposed to be taken for improvement**

1. The demand for the steel products has been gradually improving. The iron ore situation has also improved significantly on account of lifting of ban from A category and certain B category mines by the supreme court of India.
2. The steps taken by the Government to reduce the export of iron ore through imposition of export duty has started yielding positive results. Production of bellets is on the rise, some through beneficiation and others directly. This has substantially eased the raw material situation for our steel unit.
3. The demand for DI pipes is pretty robust. This has also seen price improvements in this area on account of improved demand.
4. The company has reduced the employee cost substantially through manpower optimization steps and this should bring down the fixed cost in the steel and pipe division.
5. The new products introduced by the company including small High Speed Modular Caster (HSMC), ERF using patented EldFOS process and pollution control equipment in the last few years have started gaining traction in the market. This should help the company not only to improve its sales but also profits in the Engineering & Projects division.

## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

### ECONOMY OVERVIEW:

India maintained its third position by producing 96 million tons whereas China and Japan produced 808 million tons and 105 million tons respectively. It is expected that India will become the world's largest steel producer after China in the next two years. During the year 2016-17, India consumed 84 million tons of steel also during the year, India was a net exporter for the first time in 3 years where in approximate 8.2 million tons of steel was exported.

The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output. India's crude steel production grew by 7.4 per cent year-on-year to 95.6 Million Tonnes (MT) in 2016.

The National Steel Policy, 2017 projects crude steel production capacity of 300 million tons by 2030 from about 122 million ton capacity at present. The per capita finished steel consumption is predicted at 158 kg as against current consumption of 61 kg.

The coming year may see huge demand in the steel as the government has planned to mandatorily use local steel in the government projects. The growth for steel players is expected to accelerate owing to this as well as the initiatives of the government to curb imports by introducing MIP, anti-dumping duty etc.

The various initiatives led by the Government of India like Smart Cities, Housing for all, Power for All for 24x7 by 2019, Prime Minister's Awasojana along with the necessary infrastructure investment of about Rs. 220,000 crore will boost the steel demand in the future. The government has also planned an investment of about US\$1.2 trillion over the next 20 years across areas such as transportation, energy and public security to build smart cities in India which will surely see a surge in the steel demand.

The company is optimistic about the increase in the steel demand in the country owing to favourable circumstances. However the global steel outlook remain a little subdued owing to large steel players struggling with capacity utilization, less global demand and high inventory.

### INDUSTRY STRUCTURE & DEVELOPMENTS

#### A. Engineering & Projects Division:

Engineering & Project (E&P) division's performance is directly linked with the secondary steelmaking sector in India and overseas. While India's crude steel production has recorded a growth of about 7.4% and world crude steel production has increased only marginally by 0.8% in 2016, the E&P division has achieved its highest ever sales in FY 2016-17.

The growth has primarily come from several turnkey projects that the company has undertaken overseas. This shift is a result of a transformation strategy the company had undertaken over the last decade: a shift from a single equipment manufacturer to multiple equipment manufacturer to turnkey project supplier to total solutions provider. In the last couple of years, the company has established its credential in many countries by providing total solutions and executing turnkey projects for steel making which has enabled customers produce steel with lowest CAPEX and OPEX.

The company's continuous endeavors in R&D has also paid off by way of introduction of Induction Melting Furnaces with highest efficiency. Steelmaking plants from 50,000 to 500,000 TPA capacity can now produce quality steel through IF – ERF (with ELdFOS technology) – High Speed Caster coupled with direct rolling of hot billets without reheating furnace. This route has now become the standard norm of the industry. Considering various initiatives of Government of India, with focus on robust growth of infrastructure sector, and Ministry of Steel's priorities as evident from the National Steel Policy 2017, Indian steel sector is all set to grow rapidly over next decade and more. With abolition of classification of primary and secondary routes for steelmaking, all steelmakers (including secondary ones) can now participate in the infrastructure growth story of India. Many existing smaller producers are expected to enhance their production to the tune of 0.5 MTPA and several new entrants are expected to set up such steelmaking plants over next few years through IF - ERF - Caster route due to the lower CAPEX, OPEX and gestation period as well to meet the growing demand for steel. Other steel intensive sectors like construction, automotive, capital goods and pipes & tubes are also buoyant and expected to propel growth of the steel sector.

Fume extraction and de-dusting system developed by the company for induction furnace has also been established in the market and all new furnaces are expected to be installed with this efficient fume extraction and de-dusting /off-gas cleaning system in order to meet local emission standards set by the pollution control authority.

Customer-centric product development and continuous product improvement have been the core philosophy of your company. With its out-side in approach, the company will look to develop new products both through in-house development and through collaborations to strengthen product it's portfolio. The company's R&D is focused to ensure continuous improvements in existing products to make customers' plant more productive, efficient and profitable. This should help maintain the product leadership which will help improve its market share and EBIDTA.

## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

### B. Steel & Pipe Division:

The overall demand situation for steel in the country remained muted effecting the finished goods prices. The raw material prices remained extremely volatile and the prices of coking coal, coke, iron ore and south African coal (used in sponge iron) all increased. Infact, the prices of coke almost dramatically doubled after certain developments in Australia and remained at elevated level for the remaining part of the year. This effected the profitability of ductile iron pipes.

The capacity utilization of the plant for most of our products showed improvements. On the sales side, the TMT sales increased by 12% over the last year, whereas the ductile iron pipes sales volume saw an increase of 11%.

With demand showing signs of incremental improvements, the capacity utilization is further expected to go up in 2017 – 18. This should auger well for the profitability of the company.

The company setup a fusion bonded epoxy coating facility for TMT bars thereby allowing it to cater to the niche and value added market for epoxy coated TMT bars. The product is expected to see a sizeable demand from large coastal belt of Gujarat and the state of Maharashtra.

### C. Electric Vehicle Division:

The Electric Vehicle Division has witnessed a consolidation of the market in the FY 2016-17. While the sales of 2Wheelers and 3Wheelers seeing a sharp growth over the previous year, the introduction of India's first L5 Electric 3Wheeler, 'ET Uvraj', has firmly established Electrotherm in the forefront as the leading Electric Vehicle manufacturer in the country. This is the direct reflection of Government of India's initiative to promote Electric Vehicles through the National Electric Mobility Mission Plan 2020 (NEMMP 2020) and FAME India Scheme, in its second year.

#### E-Rickshaw Market:

In the recent past, the market of E-Rickshaws has grown exponentially in India, with strong markets in North and East India. The market, which was largely dominated by unorganized small traders till a couple of years ago, has seen a sharp transformation this year with a definite shift towards organized sector with ARAI/ICAT approved vehicles. Also, new markets are emerging and the markets are gradually encompassing the Tier-3 and Tier-4 towns, as well, besides the metros and other major towns. Now, with the evolvement of approved and authorized manufacturers, the E-rickshaw market in getting stabilized and PSU banks are also looking at this market, with interest. ET manufactured E-Rickshaws, E-TAXE, are receiving very good acceptance on the strength of its superior quality, 100% made in India power train, reliability and better earning abilities.

We also entered into a strategic tie-up with IndusInd Bank for financing of our complete range of Electric 3Wheelers.

#### E-Cart Market:

Electrotherm's E-Cart vehicle, under the brand name of E-Winner, which is India's first ICAT approved E-Cart model, has been well accepted in the market. This model is filling the gap that exists between the conventional diesel/CNG driven 3Wheelers and the non-mechanized mode of goods transportation. We expect this load carrying vehicle category to create a new paradigm of business opportunities and market. We are in the process of entering into strategic tie-ups with large business enterprises both in public sector and private sector, with our E-Winner.

#### 1<sup>st</sup> Year of NEMMP 2020: FAME India Scheme

The Phase-1 of NEMMP 2020: FAME India Scheme has been successfully completed on 31st of March 2017 with sales of EVs on an upswing. The recent decision to exclude Mild-Hybrid vehicles from the purview of FAME India Scheme reinforces the Government's commitment towards the pure electric vehicles promotion, which will definitely help Electrotherm's to move ahead in the EV market space. The Demand Incentive Delivery Mechanism (DIDM) is working well and we have received all funds reimbursements from the Ministry of Heavy Industries & Public Enterprises and there is no pendency. We have successfully completed the approval and registration of ET Uvraj in FAME India Scheme, which is the first Electric 3Wheeler in the country to be approved in NEMMP 2020.

Mr. Mukesh Bhandari, Chairman Electrotherm (India) Limited, has been appointed as "Co-Chairman – Sub-Group on BMS and Battery" under National Electric Mobility Mission Plan 2020. At Electrotherm, with our credentials (technologically advanced product, largest customer base and network), we are in the best position to take the advantage of the opportunity which are being created by NEMMP 2020.

### FINANCIAL SITUATION:

The Company has incurred losses for the financial year 2016-2017. Some lenders of the Company had assigned their debt to Edelweiss Asset Reconstruction Company Limited (EARC) and to Invent Assets Securitisation & Reconstruction Pvt. Ltd. ("Invent") and Company has entered into settlement with EARC and Invent for payment of said debts. During the year, the Company has paid the settlement amount to ICICI Bank and UCO Bank.

#### Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

#### Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

In our opinion, the Company has, in all material respects, except otherwise stated or reported to the company, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
